

# HaloFogger®

Whole Room Disinfection,  
Redefined.

Aerosolized Hydrogen Peroxide.  
No Touch. **No Compromises.**

  
**Halosil™**  
INTERNATIONAL

**1 in 4 patients**  
will contract an HAI  
during their hospital stay.

**75,000 people**  
in the U.S. die from HAIs  
each year, 38% from *C. difficile*.

**If 25% of HAIs**  
were prevented, annual cost  
savings would be \$11.3 billion.

**Reimbursement penalties**  
to hospitals for HAIs are  
increasing every year.

# Raising the Standard for Disinfection, Minimizing Risk of Infection

It takes only a few pathogens to infect a patient, resident, employee or visitor, exposing your facility to significant risk. **Disinfecting your facility effectively and efficiently is among your greatest challenges.** Not only do you face the looming threat of facility-transmitted infections, but also the need to eliminate these threats in the midst of your rigorous operational demands and constraints.

# Halo Disinfection System®

## The Dry Fogging Technology Redefining Whole Room Disinfection

**The Halo Disinfection System eliminates the risk that less effective disinfection methods leave behind.**

An integral component of the system, the HaloFogger® is an affordable and easy-to-use fogging device. The HaloFogger ensures the uniform delivery of our spore and bacteria killing HaloMist disinfectant throughout every room, even in crevices and other areas beyond the reach of sprays, wipes and UV lights.

The HaloFogger leads its industry in surface coverage and effectiveness, helping healthcare, long term care, athletic and educational facilities to raise their standards for whole room disinfection. Delivering the highest possible effectiveness on the market today, **the Halo Disinfection System is EPA-proven to kill 99.9999% of *C. difficile* spores in healthcare settings.**

Pairing its industry-leading effectiveness with simplicity of use, the HaloFogger delivers a business value that is unmatched by other chemical- or UV-based whole room disinfection offerings.

### HaloMist™

**HaloMist is our proprietary, ready-to-use fogging formula registered in all 50 States.** Our unique stabilization process blends the long-leveraged power of hydrogen peroxide with antimicrobial silver ions to provide multiple killing mechanisms for attacking pathogens. HaloMist and its chemically-identical HaloSpray companion product ensure the highest possible effectiveness with no risk of increased resistance for the targeted pathogens.

## How It Works

The HaloFogger was designed to improve the way our Halo disinfectants kill. The HaloFogger generates a turbulent aerosol that uses evaporation to quickly disperse H<sub>2</sub>O<sub>2</sub> vapor and increasingly concentrated micro-droplets everywhere in complex rooms to kill germs where they hide.

**No other fogger—indeed, no other whole room disinfection technology—is more effective.**

## Features & Benefits

**EPA-validated to achieve a 99.9999% kill rate** of *C. difficile* spores in healthcare settings.

**Sturdy construction and maintenance free design** deliver years of repair-free service.

**Exceptionally dry mist** does not wet surfaces and is safe for use around electronics.

**Uniform delivery ensures consistent volume, turbulence, and droplet size** for the disinfection of all surfaces.

**Easy to use** after less than 30 minutes of training.

**Affordable system** drives a strong financial return on investment.

## HaloFogger®

## HaloFogger® FLX

## HaloFogger® EXT

<b>Description:</b>	The HaloFogger delivers complete surface disinfection throughout a room at the simple touch of a button.	The HaloFogger FLX combines the volume capacity of the HaloFogger with the nozzle flexibility of the HaloFogger EXT to provide extended range and variable locating options, even from outside the treatment area.	The multi-purpose HaloFogger EXT provides flexible nozzle positioning capability to treat a range of smaller spaces.
<b>Ideal for:</b>	Standard room sizes in healthcare, long-term care, daycare and life sciences facilities	Crawl spaces, attics, HVAC ducts, and multiple rooms or vehicles in rapid succession	Lab hoods, isolators, ambulances and vehicles
<b>Treatment Room Size:</b>	Up to 9,500 ft <sup>3</sup> / 270m <sup>3</sup>	Up to 9,500 ft <sup>3</sup> / 270m <sup>3</sup>	Up to 2,500 ft <sup>3</sup> / 70m <sup>3</sup>
<b>Timer:</b>	10-60 Minutes	10-60 Minutes	1-30 Minutes
<b>Fluid Output:</b>	50 ml (1.7 oz) / minute	50 ml (1.7 oz) / minute	25 ml (0.85 oz) / minute
<b>Hose Length:</b>	n/a	12 ft	5 ft

<b>HaloFogger Specifications:</b>	<p><b>Height:</b> 40 in / 101.5cm</p> <p><b>Width:</b> 13.25 in / 33.5 cm</p> <p><b>Depth:</b> 18.5 in / 47 cm</p> <p><b>Weight:</b> 50 lbs / 22.5 kg (without disinfectants)</p> <p><b>Reservoir:</b> Max 2 gallons / 7.58 liter</p>	<p><b>Target Dose Concentration:</b> 11ml / m<sup>3</sup></p> <p><b>Average Coverage Per Gallon of Disinfectant:</b> 11,500 ft<sup>3</sup> / 325 m<sup>3</sup></p> <p><b>Average Coverage Per Liter of Disinfectant:</b> 3,000 ft<sup>3</sup> / 86 m<sup>3</sup></p>	<p><b>Power Requirements:</b> North America 110 Volt, Frequency 50 Hz, Power 350 Watt International 220 Volt, Frequency 50/60 Hz, Power 350 Watt</p> <p><b>Certification:</b> MET UL 969, MET CE</p>
-----------------------------------	---	--	--

All devices are manufactured in an FDA registered, GMP compliant facility  
Made in the U.S.A.

### About Halosil International

**Halosil is the leader in disinfection and infection control, delivering an unmatched level of impact and value to its customers through an exceptionally effective, holistic disinfection system and proprietary hydrogen peroxide-based formulas.**

Delivering its formula through an arsenal of high-impact formats capable of disinfecting surfaces, environments and water, Halosil is the disinfection solution provider of choice across a diverse set of critical environments and infection-conscious industries—from healthcare and long term care facilities, to research laboratories and compounding pharmacies, to athletic facilities and educational institutions.

Driven by the foundational understanding that there is no such thing as “a little contaminated,” Halosil and its breakthrough capabilities have a no-tolerance policy for harmful microorganisms and are raising the standard for disinfection efforts around the globe.
